TECHNICAL SKILLS

Frontend: React.js, Redux, HTML5, CSS3, JavaScript (ES6+)

Backend: Node.js, Express.js, Firebase, WebSockets

Database: MongoDB

Other: RESTful APIs, Agile Development, Version Control (Git)

WORK EXPERIENCE

Venus Vacation

Web Developer

July 2024 – Present

- Designed and implemented modern, responsive web interfaces using React.js and CSS3.
- Collaborated with backend teams to integrate RESTful APIs for seamless functionality.
- Optimized website performance, improving load times by 20%.

Accenture

Application Development Associate

December 2022 – July 2023

- Developed and maintained scalable backend services using Node.js and Express.js.
- Assisted in the deployment of applications to cloud environments, ensuring high availability.
- Collaborated with cross-functional teams to meet project deadlines effectively.

EDUCATION

Narsee Monjee College of Commerce and Economics, Mumbai - *Bachelor of Science in Information Technology(BscIT)*

August 2019 - March 2022

CGPA: 8.33

PROJECTS

E-Commerce Application

- **Description:** Developed a fully functional e-commerce app to enable seamless product browsing, authentication, and secure payment processing.
- **Key Features:**
 - Product data fetched using FakeStoreAPI and displayed dynamically on the frontend.
 - Integrated Firebase for user authentication and secure login.
 - Payment processing implemented using Stripe API for secure transactions.
 - Built with responsive UI using TailwindCSS for optimal user experience.
- **Tech Stack:** React.js, Redux Toolkit, Firebase, Stripe API, FakeStoreAPI, TailwindCSS

Hotel Listing / Booking Application

- **Description:** Built a hotel listing and booking application that allows users to search for hotels, view details, and make bookings.
- **Key Features:**
 - Real-time hotel listings with search and filter functionality.
 - Hotel booking system with availability checks and booking confirmation.
 - User authentication and profile management for booking history using JWT.
 - Integrated MongoDB for storing hotel data and user information.
- **Tech Stack:** React.js, Node.js, Express.js, MongoDB, JWT, Bootstrap

Real-time Chat Application

- **Description:** Built a real-time chat application using the MERN stack, allowing users to send and receive messages instantly.
- **Key Features:**
 - Real-time messaging using Socket.IO for instant communication between users.
 - Socket server handles incoming user connections and processes messages.
 - User authentication and chat history management using JWT and MongoDB.
 - Frontend developed with React.js for an interactive UI and seamless user experience.
- **Tech Stack:** React.js, Node.js, Express.js, MongoDB, Socket.IO, JWT
